## **DETAILED ACTION**

### ***Priority***

1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 119(e) as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "fat piece of hard rigid material; carriage carrying the material" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

It is also noted that "extension arm (33)" as mentioned in the last paragraph is not shown.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views

Art Unit: 3723

of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

3. The disclosure is objected to because of the following informalities: page 4, line 17, reference character (22) should be changed to (21). In the last line reference character (23) should be changed to (33).

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 1 recites the limitation "said central bearings internal bore" in line 8. There is insufficient antecedent basis for this limitation in the claim.

7. Claim 1 recites the limitation "said predetermined diameter" apparently of the blade or the grinding wheel, in line 11. There is insufficient antecedent basis for this limitation in the claim.

8. Regarding claim 1, line 3, i.e., "pre-determined size preferably made" renders the claim indefinite. While "pre-determined" may be considered only objectionable, "preferably made"

Art Unit: 3723

renders the claim indefinite, since it is not a positive recitation and it is not clear the tool claimed includes this limitation or not.

9. Regarding claim 1 sections (d) and (e)-(g) render the claim indefinite. With regards to section (d) it is unclear whether a "fixed wheel" in combination with a "saw blade" or a "grinding wheel" is being claimed. With regards to sections (e) through (g), the language as written renders the claim indefinite. It appears a method of assembly (section e) and/or a method of using the tool (sections f and g) are being claimed within an article claim (fixed wheel).

### ***Claim Rejections - 35 USC § 102***

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

11. Claim 1 (as best understood) is rejected under 35 U.S.C. 102(b) as being anticipated by Chabbert (5,020,226).

Chabbert discloses all of the limitations of claim 1 as best understood, i.e., a fixed wheel (80) having a central bearing with means coupling it to a saw blade.

### ***Conclusion***

12. Prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Hume, Culman and Barnes are cited to show related inventions.
